This Radiator Trolley is one of the products proudly made in Australia by Preco Engineering.

It has been for some years satisfactorily utilised by one of the best and world renowned truck diesel engine maker.

They are being operated in more than 40 branches in Australia and New Zealand.

Heavy-duty built and proven to be a must-have tool for Truck service shops featuring the followings:

1. Safe carrying or working load (SWL) of 300Kg,
2. Radiator dimensions can be up to 1.5m in length and 1.2m in height,
3. Collapsible Carry/Handle bar for safe and easy cartage around tight spaces,
4. Drip tray with drainage plug for clinical operation,
5. High quality steel construction on swivel castors for ease of manoeuvrings.

Let Preco Engineering Radiator Trolley eliminate the OH&S issue and also improve the productivity of your shop
